

Gas and Coal Outburst Committee

The Committee formed for the 1995 Gas & Outbursts Symposium (Wollongong) and the NSW Government Department – Mine Safety Operations has identified a need to keep some type of regular seminar functioning to maintain a focus on the problems associated with gas & coal outbursts and mine gas management.

Half Day Seminar

The target audience is for a cross section of industry from Mine Management and Supervisors to Machine Operators. Industry Specialists, Equipment Suppliers and Researchers are also encouraged to attend.
